

Join the Revolution!

From Laptop computers and WiFi, to tablets, and even Smartphones, the revolution in mobile computing rages on offering access to critical data anywhere, anytime. And now finally, there's a POS and Management System for K-12 Foodservice that's revolution-ready.

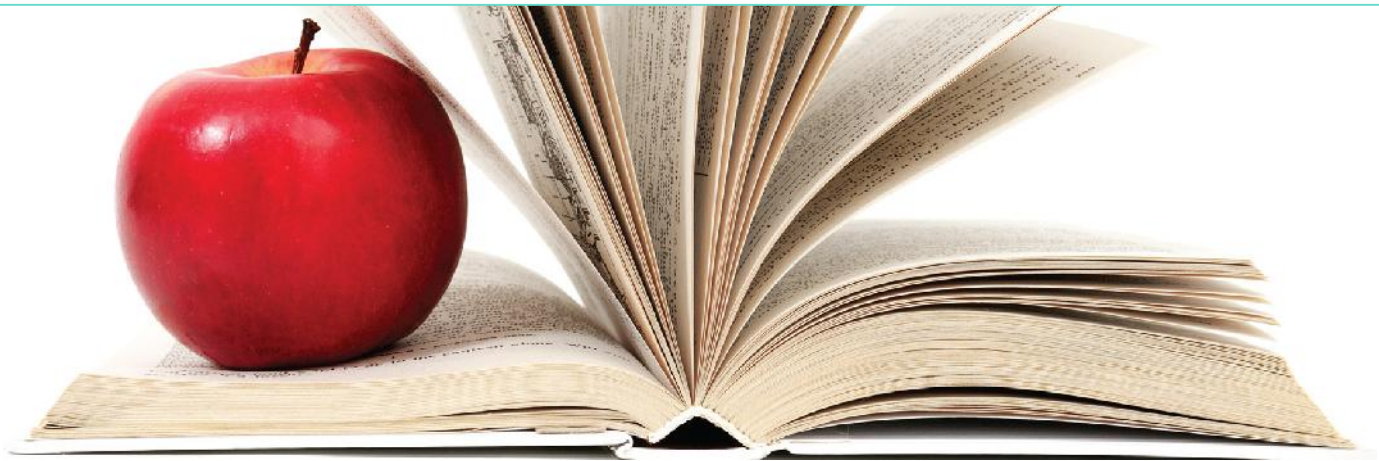

Become Empowered

Meet *mPower*, the latest in school foodservice technology from MealTime. It's built for cloud computing with a single, centralized SQL Server database – there's no user-software to install, no updates to worry about and no desktops to maintain. It offers the ease and flexibility you need to take your program to the next level.

Need to quickly set up an extra serving station for overflow or for a special event? *mPower* enables any device with a web browser to be added to the system with just a few mouse clicks! Need to access a report in your system from your home, or car, or the local coffee shop? With *mPower*, if you have an Internet connection, full access to the system and all of its data is just a quick login away! *mPower* is fast and flexible, adapting continually to the needs of your operation.

***mPower* Modules include:**

- Point of Sale — From small, single serving line schools to multi-line in-school food courts, *mPower* scales up or down easily to meet your needs!
- Central Management— Manage system settings, menu items, serving screen templates and other system data centrally and in real-time.
- Enterprise Reporting — Wherever and whenever you need it, on virtually any device that supports a web browser, if you have an Internet connection, you have full access to view and print all the data in your system.
- Eligibility Management — Complete management oversight of your free and reduced benefits program. Including applications processing, parent communication, verification, and more.
- MealTime Online Parent Portal — With *mPower*, parents and guardians are always kept up to date through the MealTime Online Parent Portal— they can make credit card payments, monitor student purchase history and even fill out and submit a free and reduced application online .

mPOWER Point of Sale

Fast and Flexible.

Built for speed, accuracy and ease-of-use, *mPower* makes the cashier's job simpler than ever before. With an ultra-intuitive screen design, new users can start serving with minimal training. Fewer clicks to complete a transaction means less potential for error and less fatigue. Faster serving lines mean happy students...and happy school administrators!

- POS runs seamlessly from an embedded web browser. After exiting *mPower*, all browser functions are disabled preventing unwanted web surfing.
- Any student can access their account and be served at any school.
- Serving stations can have up to 6 different menu templates each, with 40 menu items – a total of 240 unique menu items per POS station.
- Queuing feature allows students to identify themselves in advance of reaching the cashier. Allows even dual lines to flow smoothly. The Queue is easily managed even if students change line position.
- "Count Till" screen allows each cashier to reconcile their till right from their serving station.
- Speed up service with Photo rosters, Speed Mode, school or district search function and more.
- Collect deposits securely through the Internet with MealTime Pay Online.

mPOWER Central Management and Reporting

Comprehensive and Convenient

System parameters such as Users, Food Items and Prices, Serving Screen Templates, etc. are created centrally and can be assigned to any site within the entire system. Role-Based Security governs each user's level of access. Comprehensive reporting empowers you to retrieve the data you need and deliver it in the format most convenient for you (print, .pdf, MS Excel, text, etc.)

- Reports, including State Reimbursement Claims, often can be generated for individual schools, a select group of schools, or in a consolidated format for an entire district.
- Role-based User Security determines and controls the level of access that each user has to data and reports. School users can be restricted to accessing only the data concerning their individual school.
- Deposits and revenues are reported by individual POS station, school, service area, or by the district as a whole.

The Latest Technology

MealTime *mPower* runs on a Microsoft SQL Server database for fast, reliable operation in a completely web-based environment. All you need is a web browser! Your data is securely managed as part of our comprehensive hosting package. Soon, self-hosting will also be available as an option.

mPOWER Eligibility Management

Accurate and Accessible

mPower brings its inherent flexibility to managing all of your free and reduced beneficiaries. When you're hit with a flood of applications at the beginning of the school year, getting those applications processed is job #1. Fewer hours spent on this time-intensive task leaves more time for other priorities.

- Enter and approve applications from any Internet-connected computer, anywhere
- Detailed historical record-keeping allows you to review every stage of an application
- Calculates and monitors expiration dates by individual schools
- Create single applications for mixed households and different eligibilities (ie. one application with both income-based and foster students)
- Imports and processes any agency certification file (e.g., DC, Foster, etc)
- Calculates multi source income: hourly, two weeks, bi-monthly, monthly, annual
- Automatically prints all household communication letters (English/Spanish) with merged household address information
- Letters can be sent via traditional mail or email
- Review historical letters sent to households
- Built-in word processor - letters can be modified or created in other languages
- Tracks student movement and prepares audit history reports for students, households and household members
- Refresh your data continuously through integration with your student information system
- Track student and household change history
- Verification function selects application samples based on preferred methodology (coming Fall 2012)
- Built-in roles for data entry-only users - great for the beginning of the year
- Password security for confidentiality and data integrity
- Real-time updates for POS transactions

The screenshot shows the MEALTIME mPOWER web application interface. At the top, there is a navigation bar with the logo and user information: "Welcome, RSmith | Profile | Sign Out". Below this is a main menu with "Eligibility Management" selected, and other options like "Applications", "Reports", "Settings", and "Shortcuts". The main content area is titled "Application List" and includes a sub-header "Select an application from the list to view it." Below the header are several filter buttons: "Unprocessed", "Needs Review", "Processed" (which is highlighted), "Rejected", and "Search". A table displays a list of applications with the following columns: Application ID, Type, Signing Adult, Students, Entered Date, and Source.

Application ID	Type	Signing Adult	Students	Entered Date	Source
1000	Family	Anderson, Craig	Anthony	2/4/2012 12:37 PM	Paper
1001	Family	Roberts, George	Michael, Felicia	4/18/2012 10:17 AM	Paper
1002	Family	Garcia, Rose	Manny, Angelica	5/12/2012 8:03 AM	MTO
1003	Family	Obrien, Melissa	Kyle	5/21/2012 1:30 PM	Paper
1004	Family	Taylor, Robert	Aaron, Chris	6/2/2012 2:14 PM	MTO
1005	Family	Gabriel, Alphonze	Brad	6/3/2012 9:04 AM	Paper

mPOWER *MealTime Online Parent Portal*

Safe and Secure

Give parents timely access to information about their student's lunch account with the MealTime Online Parent Portal! The Portal contains two components – MealTime Pay Online and MealTime Apply Online.

With MealTime Pay Online, parents can make deposits and monitor their children's MealTime accounts via the Internet.

- Deposits automatically post to the correct Point of Sale account within minutes
- Parents can view balances, deposits, and purchase history online
- School fees can also be collected for any other purchases or activities you choose

With MealTime Apply Online, parents can fill out and submit a Free and Reduced Meal Application from anywhere they have Internet access.

- Secure, private method for parents to submit their application
- Schools receive applications that are complete and free of errors and difficult handwriting
- Administrators can review applications online from any computer
- Reviewed applications are imported in batches ready for processing
